

Trainee Chartered Accountant Apprentice

As a trainee chartered accountant apprentice at Plus Accounting you will receive a wide range of experience across audit, accountancy and taxation.

The firm will provide a supportive and creative environment, helping you to achieve your professional qualification and advancing your personal development. In return, we ask that you demonstrate commitment and motivation by studying hard and passing your exams, working effectively and efficiently as part of a team and help in delivering excellent client service.

Our trainee accountants gain experience through preparing financial statements for a variety of business, as well as exposure to both personal and corporation tax, preparing VAT returns and completing management accounts work.

As an apprentice, you will gain work experience while studying for the Level 4 ICAEW Certificate in Finance, Accounting and Business qualification (CFAB) by being part of the Accounts Team.

The programme is two years in duration and upon successful completion of the Level 4 Qualification you will move on to complete the ACA exams and become a qualified Chartered Accountant (Level 7 apprenticeship scheme).

Being part of our apprenticeship scheme means that all your costs for the ICAEW will be funded and the firm also provides full support towards your examinations and study leave.

Your professional exam training would be provided by Kaplan Financial and we liaise closely with their professional tutors to monitor your progress and ensure you have all the support you need to help pass your exams. We also provide a comprehensive programme of in-house training to complement your exam studies to give you the best possible chance of success.

We accept applications for trainee apprentice positions from December for entry in early September of the following year.

You must be self-motivated, possess excellent communication and interpersonal skills with a real aptitude for analytical thinking and attention to detail.

Required Qualifications:

3 A level (or equivalent) passes at grade B or above.

5 GCSE passes including Maths & English at grade B (6) or above.
